

FBS Superior: Standardized serum

In order to even the usual variations of the biological characteristics of FBS batches, Biochrom AG offers with FBS Superior a standardized quality serum. Due to the addition of selected synthetic supplements, a continuous high level of quality is guaranteed.

Manage routine cell culture in the future without any need to test FBS batches, and use the FBS Superior that provides constant quality and excellent growth-enhancing characteristics.

- once tested, FBS provides a balanced constant growth profile
- save further testing in the future
- the costs for FBS Superior are the same compared to usual EU-approved FBS
- FBS Superior is always available
- virus tested
- mycoplasma-free

On the next testing, also ask for FBS Superior and convince yourself of the high quality and the benefits, which offers FBS Superior from Biochrom AG.
